Subject: BP CAPTIONS

March 30, 2014, 3:45 p.m. Update

The U.S. Environmental Protection Agency and the U.S. Coast Guard were on site today to oversee day seven of cleanup operations following an oil spill into Lake Michigan that BP reported on March 24. Today, Sunday, a Shoreline Cleanup Assessment Team examined the shoreline and conducted a submerged oil assessment to determine if any oil from the release sank to the bottom.

Today the shoreline cleanup assesement technique team assessed the boulder riprap, coastline beach and pebble cobble riprap to determine the status of the cleanup to date. Come summer when the water has warmed an additional inspection may take place. Thanks. F
